SAHIL KUMAR NANDA

SOPHOMORE

PROFILE

I'm pursuing my B.tech in Computer science at Gandhi Institute for Technological Advancement. I believe that, the best way to learn something is by yourself .My habit is to hone my existing skills by implementing them consistently. Because I believe that learning is useless when you don't implement them.

WORK EXPERIENCE

- **web developer at famoron**

  I've been working at famoron for 6 months as a freelancer. Till now I'v worked on frameworks like Angular, Ionic, Wordpress etc for some client projects. As this a startup of our college'ssenior, I'm getting some decent number of projects to work on and I'm willing to learn more.

- **web developer at VIP Gems Mart**

  Recently I've worked with a E-commerce project of VIP Gems Mart, which is a gemstone company at Cuttack, Odisha. Here our task was to completely redesign the website into a E-commerce app. My task was to design the frontend which was given by the UI designer. Here I've used some boilerplatess like Angular, and , Material.io etc. In this project the difficult part was to accurately implemnt the UI into the frontend code. But somehow I resoluted every problems.

- **Object Detection**

  This project can help you determine how many bottles are there in a store . Here I have used power AI vision which uses deep learning to create trained models based on our images and labels.
